

IN THE SPECIFICATION

*Please replace the paragraph on page 9 at lines 22-30 with the following corrected replacement paragraph:*

Microprocessor 238, in addition to its operating system functions, preferably enables execution of software applications on mobile station 202. A predetermined set of applications which control basic device operations, including at least data and voice communication applications, will normally be installed on mobile station 202 during its manufacture. A preferred application that may be loaded onto mobile station 202 may be a personal information manager (PIM) application having the ability to organize and manage data items relating to user such as, but not limited to, e-mail, calendar events, voice mails, appointments, and task items. Naturally, one or more memory stores are available on mobile station 202 and SIM ~~256~~ 262 (denoted as "mem" for "memory" in FIG. 2) to facilitate storage of PIM data items and other information.
